Summary

UI/UX Designer with 2 years of experience. Miguel have some basic knowledge of HTML, CSS, React.JS.

Skills

Nov. 2022 to Present

HCL Software
NCR, Philippines

UI/UX Designer

I am the only UI/UX Designer working for HCL Labs team. Work on 6 different projects under HCL Labs team.

Projects

1. AdminUI - A site where all APIs available are being managed
2. QuickStart - A site where it helps the developer to create their own instances, monitor available servers, share instances to other people, and etc. with a few clicks.
3. Adapter - A team that supports those datatypes that are not yet supported in Volt MX Iris.
4. Design Import - An import wizard used to move design elements of Domino to Volt MX Iris
5. First Touch - A demo app that used to showcase the capability of Volt MX Iris
6. QuickStart on the Go. - the mobile version of QuickStart

I was responsible to redesign the UI/UX of all those 5 projects. My general tasks includes:

- Apply basic Design Thinking process to all projects
 - Define or researching pain points
 - Ideation (wireframing)
 - Prototype
 - Testing/Feedback (including software engineer, stakeholders, project managers)
 - Iteration

- Asking for feedback (about what to improve and what they think about the proposed improvement provided by me)
- Creating mockups based on high fidelity design
- Researching if the design is technically feasible
- Coordinating with software engineers to discuss if the design is technically possible or not
- Creating Design System for all projects
- Presenting the current mockup/ideas to stakeholders/project managers.

The tools I used mainly is Figma

I have also some basic knowledge about web development

- HTML
- CSS
- React.JS
- Tailwind
- Framer motion

July. 2022 to Aug. 2022 **Freelance – Production Monitoring Tool**
NCR, Philippines

UI/UX Designer and Front-End Developer

Production Monitoring tool is a monitoring tool used by financial advisor, I was tasked to redesign and develop the front-end side as well.

As a UI/UX Designer:

- Used the Design thinking process to help me organize my task process
 - Empathize/Research
 - Define
 - Ideate
 - Testing/Feedback
 - Iterate
- Used Figma as a main tool for designing low and high fidelity wireframe

As a Front-End Developer:

- Used React.JS as a main framework
- Used HTML, CSS, Javascript, and materialUI
- Used Visual Studio Code as IDE
- Make the web app more responsive.

Dec. 2021 to March 2022 **ePLDT**
Makati Ave. Makati City, Philippines

Technical Consultant

Retool from Avaloq Technology to Salesforce Technology. Currently undergoing as a Trainee to prepare as a Mulesoft Integration Specialist.

- Exposed to an Apex Code (proprietary language that is based on Java used by Salesforce)
- Helped organized and creating a Demo data for a specific part of module in Landers project.

Aug. 2021 to Nov. 2021 **Accenture**
Makati City, Philippines

Business and Technology Delivery Specialist

Was assigned to work on BDO project and as a Stream Lead for the Output Module in Avaloq Technology. Worked also as a Tester.

I acted as a Stream lead.

- I provide technical coaching to my teammates,
- I also raise, create, and manage bug tickets through Jira Atlassian.
- I also acted as a developer as well on the CCM DocFamily Software.

During this time I also help the team to

- Test their task.
- Update any necessary details to the Jira ticket assigned to the developer

Oct. 2019 to Sept. 2020 **Alphasquare**

Freelance Consultant

Was assigned to work on a one of the largest Private Indonesian Bank.

As a Developer:

- Provide Solutions for new features based on the requirements.
- Responsible for creating Screen and file reports
- Solely Responsible as well for reworking the Bank's Statements and Advices through CCM DocFamily Software.
- Fixing debugs and providing solution for change requests.
- Used PL/SQL Technologies
- Provide immediate support to clients
- Responsible for communicating to clients what fields, attributes, or in general how the Bank's advice and statement should look like.

As a Tester:

- Responsible for creating Test cases for the whole Output module of the Bank's Avaloq Software version.
- Responsible as well for doing a unit testing those test cases and provide the file of, generally, the expected and actual result.
- Responsible as well for doing a test cases steps for the test engineers on the Bank's side

Aug. 2016 to Oct. 2019 **Avaloq Philippines**
Makati, Philippines

Associate Software Engineer

- **APO Team**

As a Developer:

- Created new software module based on the APO Bank requirement
- Update CCM template of different business areas
- Fix bugs regarding CCM of different business areas
- Created New Bank Advices in CCM
- Used PL/SQL Technologies
- Created the Letter correspondence functionality that is only available in APO bank

As a Tester:

- Provide Unit Testing that shows the actual and expected result.
- Was included as well to do regression testing

- **ABR/s QTD Team**

As a Developer:

- Fix the bugs found by me or my teammates
- Used PL/SQL technologies

As a Tester:

- Functional testing of the current document and the current version of the System, if there is any discrepancies, then update the document.
- Raise an issue using Jira Atlassian if bug was found.
- Responsible as well for creating a Unit test file to contain all the screenshot, execution instruction, comments, expected and actual result

- **ABR/s Project Team**

As a Developer:

- Fixing bugs on different business areas
- Converting the workflow process (WFD) for some business type areas.
- Used PL/SQL technologies

As a Tester:

- Unit Testing for every bug solved
- Raised a bug issue using Jira Atlassian.

- **Other roles/Experienced:**

- Provide Training to new joiners/clients.
- Interact with BA/Colleague from Germany and Singapore to make sure the requirements are all aligned.
- Update the Documentation for some Business Type.
